Web Lab assignment – 3 HTML5

Design and implement **a personal Web site.**

1. Design home page: The Web site should include at least the following:

   - Mention your bio. your Basic details, id, and favorite Web sites etc in **layout**

   - A proper title to be displayed on the title bar

   - A header to display your name by **SVG**

   - An iframe that include your photo and quote

   - Emphasize the important words in your paragraph using strong formatting style

   - An image to display a nice view of your choice by **CANVAS**

   - A link to the other page

2. The other page must have:

   - A list of at least two hyperlinks to show your favorite Web sites one of them an image link and also link to your social media accounts
   - A link to the homepage

3. Create "Hobbies" page, Create Rectangle shapes which include unordered list with image bullets of your choice.

4. Create achievements and goal page. It should include different border styles to mention the achievements and goal.

5. Add a link in the drop-down menu to the "Travel" page. The page shall include Wikipedia link reference: http://en.wikipedia.org/wiki/mangalore. Use distinctive styles for the link, visited link, and when rolling over the link. You can utilize color, text-decoration, and background-color properties to achieve that.

6. Contact us page to display the current location and contact details

7. Upload video which you captured

8. **Draw any shapes by SVG and CANVAS**

9. Display resume
